OVERVIEW

Canadian Blood Services Stem Cell Registry (stem cell registry) donors will be permitted to donate hematopoietic stem cells a maximum of two times (includes any previous unrelated and related stem cell donations). This does not apply to unstimulated leukocyte donations or MNC, Apheresis. All requests for additional donations for the same patient will be submitted to the stem cell registry Medical Panel for review and approval.

The criteria and policies for additional product donation requests can vary among international registries. The stem cell registry will provide information regarding an international registry's policy upon request from the transplant centre.

After the initial collection, the donor will advise the stem cell registry of his/her willingness to donate an additional product if requested by the transplant centre in the future. The stem cell registry will notify the transplant centre *only* if the donor has indicated unwillingness to proceed with an additional donation. If the donor agrees to a second donation, he/she will remain unavailable for other recipients for one year from the date of donation.

In the event additional products will be requested from a donor as part of a planned treatment protocol, the transplant centre must include this information at the time of the first work-up request. Such protocols will be subject to review by the stem cell registry Medical Panel, and if approved, will be discussed with the donor at the time of the initial work-up.

The stem cell registry does not require specific intervals between donations, however, at a minimum the donor must be considered recovered from a previous donation (minimum 4-6 weeks after engraftment and with medical panel approval) before being approached to make a subsequent donation.

PROCESS

<p>8.1. Requesting an Additional Donation</p>	<p>8.1.1. Send the following stem cell registry forms or international registry equivalent to the stem cell registry:</p> <ul style="list-style-type: none"> • <i>Work up Request and Prescription for HPC, Marrow; HPC, Apheresis and/or MNC, Apheresis</i> • <i>Previous Transplant History</i> <p><i>Note: The National Marrow Donor Program (NMDP) requires World Marrow Donor Association (WMDA) forms to be completed for all additional donation requests, which can be found at https://wmda.info/professionals/optimising-search-match-connect/wmda-forms/.</i></p> <p>8.1.2. Provide any additional information, if requested by the stem cell registry Medical Panel or Medical Director.</p> <p>8.1.3. Receive approval of the request and refer to Section 6, <i>Requesting a Donor for Work-up</i>.</p>
